

# Fear

If you can't stand the day, and you're still alone  
if fear takes your heart and you don't know where to go.  
You feel like a child, unprotected and small  
life runs through your hands, the fear hears your call.

The fear takes control, you can't set you free  
there's a cloudy sky, and it's no hope to see.  
Try to turn around, to a different view  
'cause if you not do, the fear is gonna kill you.

## **Bridge soft:**

Now your life is changed, all chains are gone  
inside yourself, you feel power and hope.  
Your mind is open wide, your view is clear  
you're back in life, there is no more fear.

## **Bridge heavy:**

Fear is not longer a chain  
'cause you're back in life.  
Fear must let you go  
now you're strong, now can your life flow,  
it can flow, come on let it flow  
you're strong, now can your life flow.
